dynata

PANEL BOOK

DYNATA RESPONDENT CAPABILITIES

See why Dynata leads the industry in providing the highest quality first-party data.

Dynata: where quality drives decisions

Dynata is the world's largest first-party data company, delivering research-grade data from real, verified people to shape global business decision-making.

With a 96% data acceptance rate, we take a holistic, multi-layered approach—combining our unmatched first-party panel, expert oversight, and AI-driven fraud detection—to deliver superior data quality across every dimension.

From market research and consulting to media, advertising, and corporate strategy, more than 6,000 clients, including Fortune 500 companies, depend on Dynata to transform trusted insights into action.

WHAT MAKES DYNATA DATA DIFFERENT

96% data acceptance rate
Client rejection rates for other data providers are 2 – 5x our rejection rate of 4%.

Global reach, precise targeting
We deeply profile our first-party panel to connect you with the right people, anywhere in the world.

Validated, thoughtful responses
We know our respondents and ensure accuracy through unique IDs and active relationship management.

Audience representativeness
We help ensure your data reflects the audience you need, supporting better targeting and projectability.

Survey-to-survey consistency
Our rigorous execution enables reliable tracking and wave-on-wave comparability.

Realistic feasibility
We assess delivery timelines and costs accurately to meet your project goals.

Privacy-first approach
We're fully GDPR-compliant and prioritize respondent privacy and data security.

Multi channel
While the majority of our surveys are conducted online, they are multi-modal and we can conduct surveys via multiple methods as needed.

Focus on people—the right people

Our reach extends beyond our panel. We're experts at getting the right person at the right time into the right survey.

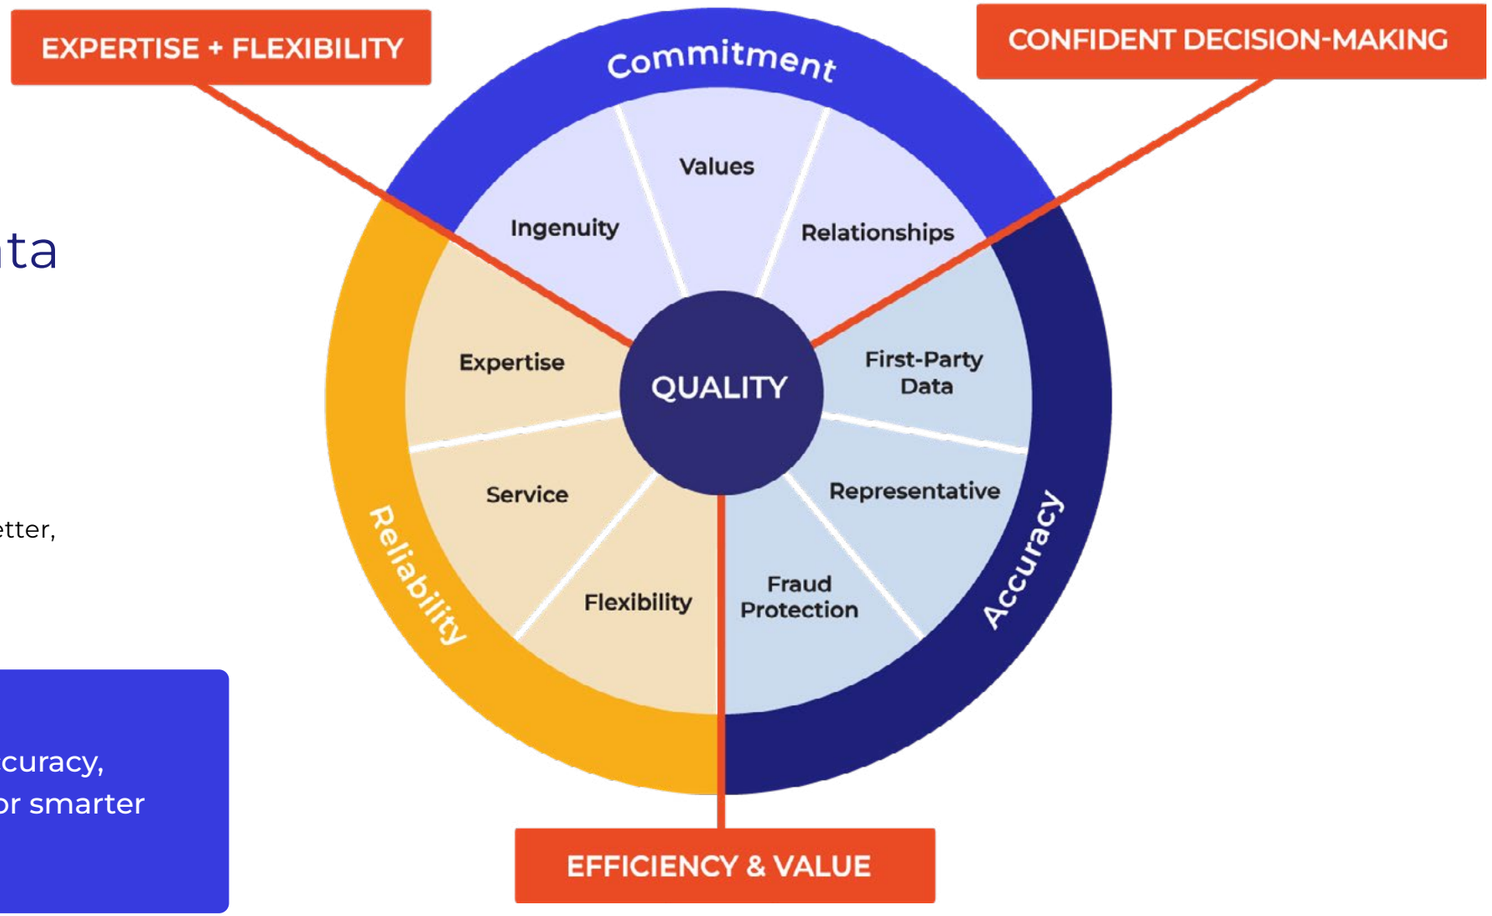

About Quality

At Dynata, we've developed a sophisticated, multi-layered data quality system that continues to evolve.

By combining our people, process, and products with the latest AI and machine learning technology, our systems continuously get better, staying a step ahead and always delivering high-quality data.

Dimensions of quality

At Dynata, we focus on three dimensions of quality—accuracy, reliability, and commitment—that are the foundation for smarter decision-making at scale.

Data quality starts at the source: **our respondents**

Data quality starts with respondent recruitment

We monitor and engage panelists at every step of the research journey, from sign-up to sampling through to the survey and reward redemption and have built a panel of 70+ million people spanning 82 markets.

Industry-leading panelist engagement, compensation, and retention

We invest heavily in quality recruitment, panelist relationships, and fair compensation to achieve the highest member engagement and retention. The riskiest data comes from someone you don't know – data coming from exchanges lacks insight into respondents' tenure, profile, and prior response history. Roughly 70% of all completed surveys from Dynata are produced by panelists who have been active members for more than 1 year. Less than 15% of our monthly proprietary panel production comes from members recruited in that same month.

Future-proofed, privacy compliant data

Dynata is a future-proofed, first-party data provider, producing panel assets that are wholly owned, operated, and managed using in-house platforms, terms and conditions, and privacy policies. Panelists interact with Dynata's owned/operated platforms in preparation for the phase-out of third-party cookies.

AI to improve the member experience

At Dynata we use AI and ML not only for quality assurance purposes but to match respondents with the surveys that they are likely to qualify for and participate in to optimize both participation and engagement.

AI at the core–self-improving technology: **our tech**

We've developed highly sophisticated ML-based fraud detection and scoring systems with tight integrations at each panelist touchpoint which span deduplication, bot prevention, recruitment quality management and real-time open-end quality evaluation. Many competitors tout quality systems but they lack the holistic, end-to-end integration needed to be truly effective. Our systems deliver the highest data acceptance rates in the industry.

Award-winning QualityScore™ ML model

QualityScore analyzes 175+ data points to identify survey fraud and inattention. Fraudulent and low-quality respondents are removed and replaced live during fielding, resulting in extremely high sample accuracy, reduced field times and less time spent cleaning the final data set. Clients have estimated that this results in time savings of up to 85%.

AI and ML used to fight future fraud

Rejected IDs are fed into our machine-learning models for training, constantly improving our monitoring and keeping it abreast of the latest problematic trends. This also helps identify any sources that merit deeper investigation.

And when we measure our performance, we outperform competitors across all quality dimensions

Open-end quality

% of open-end responses that are judged as good quality and usable

Sample acceptance

% of the completes we deliver that are judged to be good quality and usable

Over-qualification

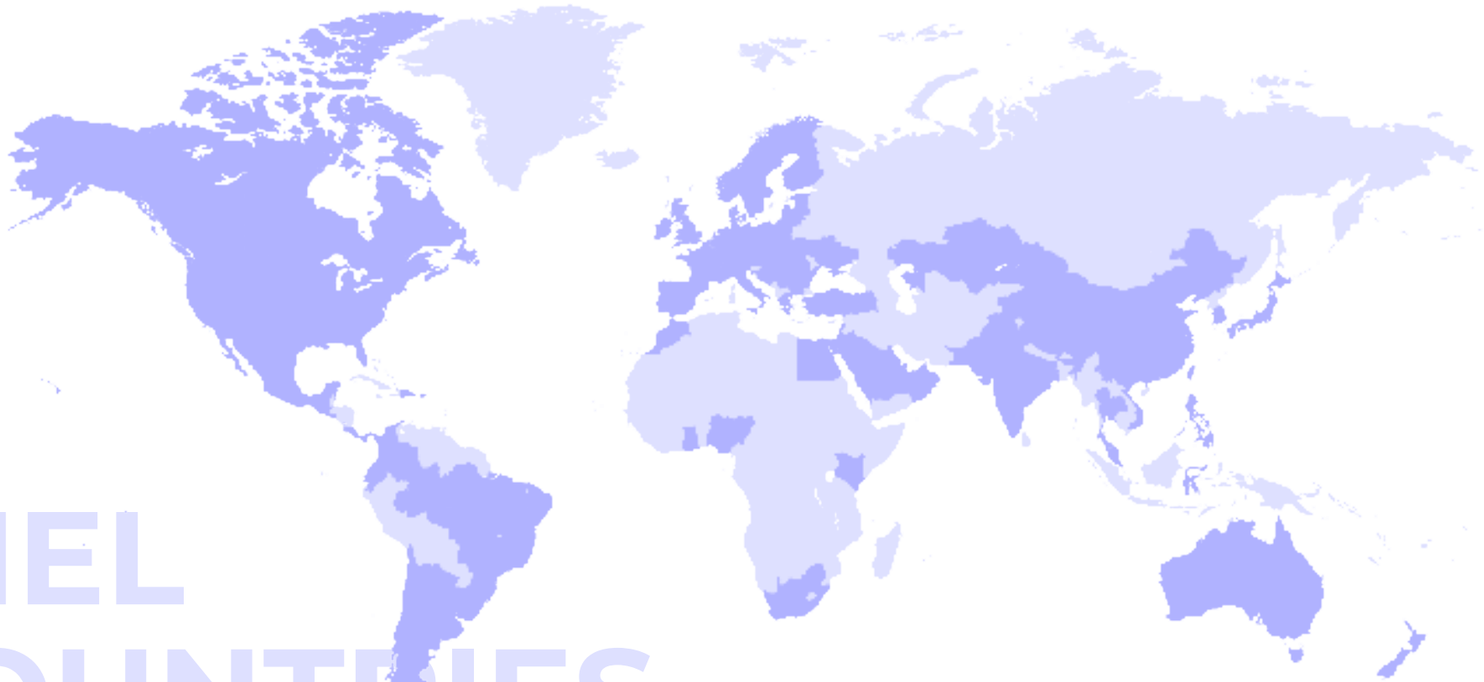

% of respondents who misrepresent screening criteria

Representativeness

How representative our samples are in terms of behavior and demographics

Reach the right people, anywhere, anytime

Dynata delivers the scale, precision, and consistency you need for high-impact research and campaign outcomes. We realistically assess feasibility and provide unmatched access to even the most niche or hard-to-reach audiences, anywhere in the world.

Source smarter: real people, real diversity

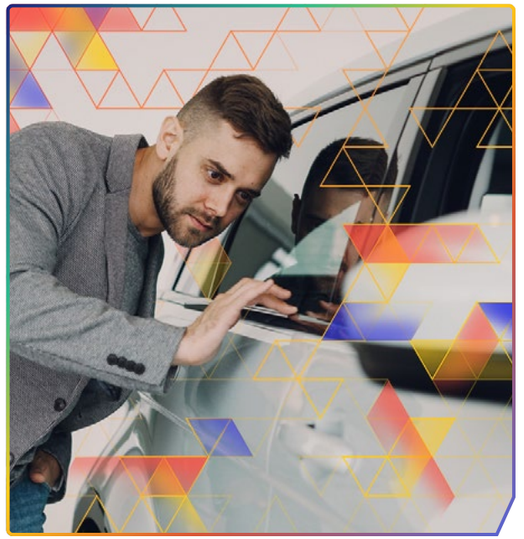

At Dynata, data quality starts at the source: our respondents. Our sophisticated, multi-layered recruitment and quality assurance systems ensure high-quality, diverse, and representative first-party data at a global scale.

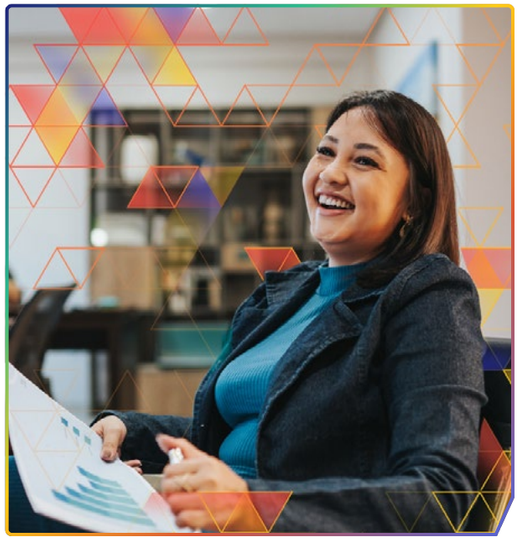

We recruit from over 2,000 sources worldwide and review our partners regularly to ensure they meet our precise standards.

Our model integrates people, processes, and advanced technologies, including AI and machine learning, to deliver clean, trusted data for every project.

Source name	Recruitment	Rewards	Strengths
Loyalty panels	Loyalty program members from leading global brands in travel, entertainment, media, retail, etc. are invited to join our panels.	Points or miles relevant to the program source.	More affluent, high quality, pre-validated individuals with known characteristics.
Organic, open enrollment & partnerships	Online and mobile channels: websites, social media influencers, and apps.	Points to redeem for cash, prizes and gift cards.	A wide range of incomes and demographics, generally younger, less affluent, and more ethnically diverse.
Respondent exchange network (REX)	Dynata sources respondents via direct API connections with a broad range of external, highly-engaged consumer communities. Dynata leverages its extensive, holistic quality systems to ensure quality from these respondent communities.	Points, miles, currencies and/or gift cards relevant to the program source.	Extends our reach to high-value, hard-to-reach audiences both inside and outside traditional research communities, enhancing our panel diversity and driving efficient, at-will extension of our global audience reach.

Research for the real world: capture each and every voice

Reach underrepresented audiences with inclusive recruitment.

DEI isn't a box to check: it's built into how we recruit. At Dynata, we use a multichannel, always-on approach to engage populations across race, gender identity, age, ability, socioeconomic background, and other characteristics.

We've built an ecosystem that actively brings diverse voices into your research.

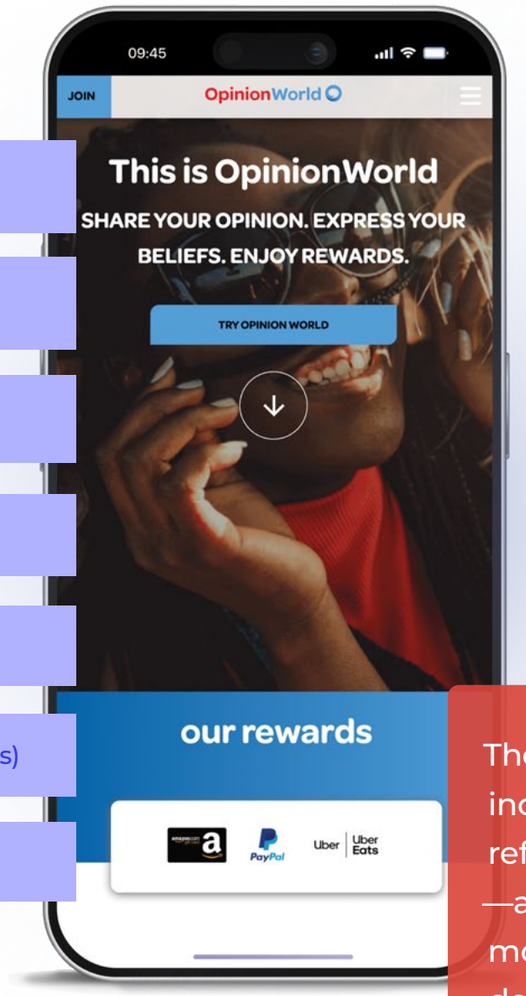

Widest reach in the industry:
Engage historically underrepresented groups via mobile apps, influencers, loyalty programs, and diverse social platforms.

Inclusive by design:
Tailored messaging and rewards resonate with different communities.

Accessible to all:
Mobile-first platforms are Web Content Accessibility Guidelines (WCAG) 2.0-compliant, supporting all devices and abilities.

RECRUITMENT CHANNELS:

- Loyalty networks
- Communities and apps
- Search advertising
- Influencer agencies
- Email marketing
- Demand-side platforms (DSPs)
- Social media

The result? Reliable, inclusive insights that reflect the real world—and drive smarter, more confident decisions.

From answers to activation: the power of Dynata data

At Dynata, we go beyond data collection: we connect you to the full spectrum of audience insights. We deliver research-grade, high-quality, permissioned, first-party data as the foundation for your decision-making. From there, we help you to enrich and scale that knowledge through connected data partnerships and to activate those insights through CRM integration and ad exposure matching.

Whether you're looking to better understand your audience, reach them more effectively, or measure the impact of your messaging, it all starts here.

ONE PLATFORM, DEEPER INSIGHT.
From survey to activation, Dynata connects you to high-quality, scalable data that fuels smarter decisions at every step.

Start smart: build insights on a strong first-party data foundation

Dynata offers an extensive, meticulously curated library of business and consumer profile attributes, all collected directly from individuals through surveys. This robust, first-party data resource is carefully designed and continuously managed to deliver key advantages – including precise audience segmentation, unmatched reliability, and superior feasibility for your research needs.

Unlock the power of deep profiling

Precise, global targeting
We deeply profile our global panel to zero in on your relevant target audience.

Dynamic, real-time data
Stay ahead with constantly updated profiles and the flexibility to add new data points as your needs evolve.

Permissioned, actionable data
Access high-quality, recontactable first-party data for trustworthy, actionable insights.

Transform insights into action
Leverage survey data to create and activate precise, high-performing audience segments that drive results.

Thousands of consumer profile attributes that span behavioral, attitudinal and demographic attributes >> precise targeting

Dynata collects thousands of self-reported data points, helping you reach your target audience with precision and confidence. Below is a selection of some of our most-used consumer profile attributes – helping you reach your target audience with precision and confidence.

Enrich & expand: go beyond first-party data

Access expanded, high-quality profile attributes from leading data providers – giving you a richer, more complete view of your audience to fuel smarter decisions.

Uncover what first-party data can't
Fill in knowledge gaps with behavioral, financial, lifestyle, or firmographic details.

Sharpen targeting precision
Create more accurate segments and lookalike audiences.

Gain deeper customer understanding
See how your audience thinks, behaves, spends, and votes.

Deeper data in real time
Dynata has built partnerships with leading data providers – enrich your data in real time.

Dynata partners with industry-leading data providers

Extend your understanding with financial, lifestyle, and voter data to reveal deeper audience truths.

experian. — 50+ countries

Leading global provider of consumer data and insights. 300M+ consumers, 126M+ households.

- Demographics
- Financial data
- Lifestyle & interest data
- Modeled credit score
- Risk management score
- Segmentation data

ACXIOM — 60+ countries

Offers rich consumer data with predictive behavioral insights.

- Demographics
- Lifestyle
- Purchase behavior
- Audience propensities
- Segmentation data

claritas — US only

Specializes in demographic and financial-related data across 60+ household segments.

- Demographic, lifestyle, & behavioral data
- Consumer financial assets, banking behaviors, & product preferences

TargetSmart L2 BETTER DATA BETTER DECISIONS — US only

DATA TRUST ARISTOTLE Now You Know™ Catalist

Voter data provider. 240M+ individuals across all 50 US states + D.C.

- Voter-registration data
- Political affiliation
- Voting behavior

CACI — UK only

Segmentation tools providing detailed consumer and financial behavior insights.

- Demographic characteristics by postcode
- Social & lifestyle indicators
- Consumer behavior & preferences
- Financial behavior & services usage
- Updated segmentation with Fresco 20 for enhanced financial classification

EQUIFAX — US only

Provider of directly-measured financial data covering over $20 trillion in consumer assets.

- Verified income estimates
- Spending capacity (Spending Power, Affluence Index)
- Financial durability & ability to pay
- Credit risk scores
- Economic cohort classifications
- Asset & investment data across financial categories

dun & bradstreet — US focused*

Provider of business-level data with coverage of over 250 million companies worldwide.

- Unique B2B business identifiers
- Industry classification
- Revenue & financial indicators
- Firm size & number of employees
- Geographic location
- Real-time in-survey matching to firmographic data

**Global reach possible upon*

Porch Group *(formerly V12)* — US only

Largest and most accurate automotive ownership data. 215M+ consumers, 186M+ VIN records.

- Demographics
- Financial data
- Lifestyle & interest data
- Credit score
- Risk management score

choreograph A WPP Media Brand — US only

(formerly Wunderman Data Products)

Consumer data provider combining demographic, lifestyle, attitudinal, and purchase behavior insights.

- Demographic data
- Health-related data
- Interests & lifestyle indicators
- Attitudinal data
- Actual purchase data from credit & debit card transactions
- Modeled purchase propensities
- Product group & category preferences (11 groups & 50+ categories)
- Brand affinities

From insight to action: put your data to work

Seamlessly connect to your CRM & media ecosystems

Dynata helps you translate insights into action by connecting our data to your systems and workflows. From customer database matching to ad delivery, we make your research immediately usable – without compliance risks.

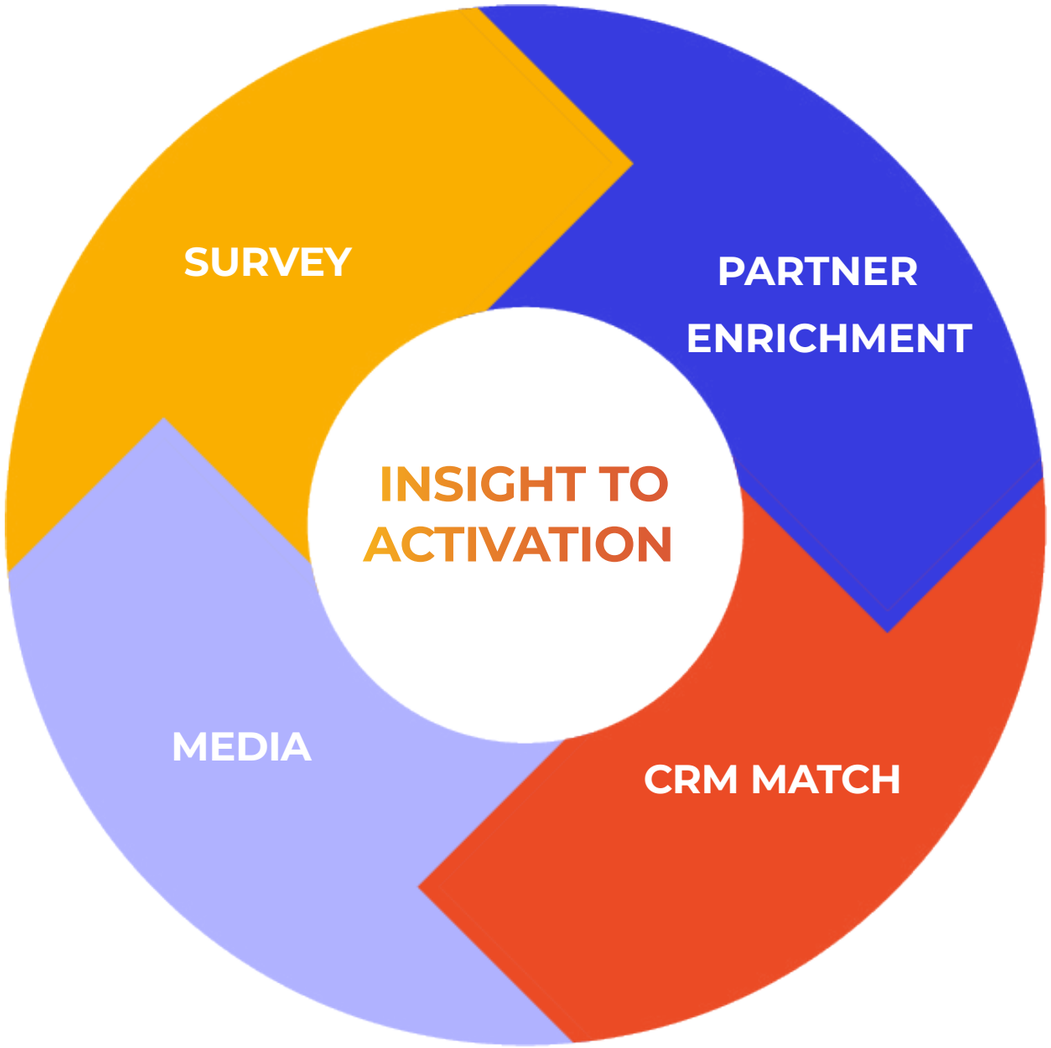

Integrate into your CRM or Customer Data Platform (CDP) to uncover new segments or upsell opportunities

Fully compliant data usage and analytics matching

Match to media plans and audiences for targeted activation

Supported by agency and martech partnerships

Seamlessly integrate survey insights into your CRM for new upsell opportunities, segmentation, and media activation.

Talk with our team today to learn how we can tailor a solution for you.

Whether you’re looking to go deeper with profiling, or access hard-to-reach audiences Dynata is here to help.

dynata™

At Dynata, we deliver the highest quality first-party data to help businesses around the world gain precise insights, activate the right audiences, and confidently measure impact. With industry-leading accuracy, reliability, and commitment, we provide the foundation for smarter decision-making.

We own and operate one of the largest first-party panels in the industry with millions of deeply profiled and active consumers, business professionals, and hard-to-reach audiences across 82 countries.

With an extensive library of over 2,700 profile attributes collected through surveys, and the ability to sample respondents in global markets, Dynata is uniquely positioned to deliver deep, precise, and high-quality insights for confident, data-driven decisions.

Dynata has built innovative data services and solutions around our robust first-party data offering to bring the voice of the customer to the entire marketing lifecycle – from uncovering insights to activating campaigns and measuring cross-channel marketing ROI.

Thanks to our proprietary loyalty-based approach, we recruit respondents from more than 2,000 diverse sources, ensuring inclusive representation across cultural and demographic lines.

Dynata empowers market research firms, media and advertising agencies, publishers, consulting and investment firms, and corporate clients across North America, Latin America, Europe, Middle East & Africa and Asia-Pacific.
